

Permissible Modifications

1. If extending the height sensor harness is necessary because of the size of the vehicle, order one of two kits:
 - a. 27700 Kit-Height Sensor 4' Ext (2 extension harnesses)
 - b. 27701 Kit-Height Sensor 8' Ext (2 extension harnesses)
2. If it is necessary to extend the display cable beyond the 4-foot cable that is supplied, purchase a USB A/M adapter extension of up to 8 feet. Use an off-the-shelf USB 3.0 cable if possible.
3. If using an Air-Zenith OB2 compressor, follow the wiring diagram below (fig. 33). The 70A fuse, relay, etc. are supplied with compressor. Wiring requirements for the compressor should follow manufacturer's recommendation.
